Mind the Map Nov 06 2020 Maps speak a universal language and make the world accessible. A follow-up to our -best-selling publication A Map of the World, this book features the cutting-edge of creative contemporary cartography.

The User's Journey Feb 28 2020 Like a good story, successful design is a series of engaging moments structured over time. The User's Journey will show you how, when, and why to use narrative structure, technique, and principles to ideate, craft, and test a cohesive vision for an engaging outcome. See how a "story first" approach can transform your product, feature, landing page, flow, campaign, content, or product strategy.

Map of Flames (The Forgotten Five, Book 1) Sep 24 2019
X-Men meets Spy Kids in this instant New York Times bestseller! Here's the first book in a new middle-grade fantasy/adventure series from the author of The Unwanteds. Fifteen years ago, eight supernatural criminals fled Estero City to make a new life in an isolated tropical hideout. Over time, seven of them disappeared without a trace, presumed captured or killed. And now, the remaining one has died. Left behind to fend for themselves are the criminals' five children, each with superpowers of their own: Birdie can communicate with animals. Brix has athletic abilities and can heal quickly. Tenner can swim like a fish and can see in the dark and hear from a distance. Seven's skin camouflages to match whatever is around him. Cabot hasn't shown signs of any unusual power—yet. Then one

day Birdie finds a map among her father's things that leads to a secret stash. There is also a note: Go to Estero, find your mother, and give her the map. The five have lived their entire lives in isolation. What would it mean to follow the map to a strange world full of things they've only heard about, like cell phones, cars, and electricity? A world where, thanks to their parents, being supernatural is a crime?

Metropolis Feb 07 2021 How the city was imagined in maps from ancient times to the present day.

Mitchell's Ancient Atlas, Classical and Sacred, Containing Maps Illustrating the Geography of the Ancient Worlds, as Described by the Writers of Antiquity [...! Feb 19 2022

Mapping the World Apr 11 2021 Tells the story of the philosophers, travellers, artists, and scientists who contributed to the history of cartography, from prehistoric cave paintings to NASA Landsat maps in the twenty-first century.

Indonesia, Etc.: Exploring the Improbable Nation Dec 28 2019 "A spectacular achievement and one of the very best travel books I have read." —Simon Winchester, Wall Street Journal Declaring independence in 1945, Indonesia said it would "work out the details of the transfer of power etc. as soon as possible." With over 300 ethnic groups spread across over 13,500 islands, the world's fourth most populous nation has been working on that "etc." ever since. Author Elizabeth Pisani traveled 26,000 miles in search of the links that bind this disparate nation.

A compendious introduction to the study of the Bible ... Illustrated with maps and other engravings, etc Aug 16 2021

They Draw and Travel: 100 Illustrated Maps of Very Special Places Nov 26 2019 The maps in this book were submitted to They Draw & Travel as entries in a 2019 contest called Mapping Special Places. This contest,

sponsored by Strolly Inc., challenged artists around the world to create a map of a place that is very special to them. While over 300 maps were submitted to this contest, 100 of them appear in this book. They represent a global sample of the various special places chosen by 100 different artists. Some chose to illustrate their home town, while others picked a favorite vacation spot. Some maps tell a story, others provide fun itineraries, a few share insightful histories, and they all beautifully celebrate a place that is indeed very special.

Maps of the World Jun 25 2022 A lavishly illustrated, fact-filled, oversized atlas that allows children to discover the world without leaving their home. Covering every continent, country, even outer space, Maps of the World is a vibrant and comprehensive atlas that children of all ages will love to explore. The dozens of colorful, detailed maps are filled with charming, educational icons representing the aboriginal people in Australia, giant tortoises in the Galapagos, the Gold Rush in California, traditional dress in Mali, and even James Bond in England. Flip the next page in the book, and the corresponding icon key explains hundreds of these cultural, environmental, and societal illustrations. Organized by continent, the atlas also includes details on populations, language, agricultural, politics, and other bite-size facts. Each map includes a link allowing kids to download a version of them on computers and tablets to explore even further. Captivating and comprehensive, Maps of the World will entice even the most reluctant young explorer.

Follow That Map! Jul 27 2022 Explains and demonstrates key mapping concepts, discussing the use of symbols, legends, a compass, scale, landmarks, and gridlines, along with instructions for making a map of a bedroom.

Mapping Time Jun 13 2021 Engaging look at the cartographic challenge of visualizing time on a map.

Web Mapping Illustrated Sep 16 2021 With the help of the Internet and accompanying tools, creating and publishing online maps has become easier and rich with options. A city guide web site can use maps to show the location of restaurants, museums, and art venues. A business can post a map for reaching its offices. The state government can present a map showing average income by area. Developers who want to publish maps on the web often discover that commercial tools cost too much and hunting down the free tools scattered across Internet can use up too much of your time and resources. Web Mapping Illustrated shows you how to create maps, even interactive maps, with free tools, including MapServer, OpenEV, GDAL/OGR, and PostGIS. It also explains how to find, collect, understand, use, and share mapping data, both over the traditional Web and using OGC-standard services like WFS and WMS. Mapping is a growing field that goes beyond collecting and analyzing GIS data. Web Mapping Illustrated shows how to combine free geographic data, GPS, and data management tools into one resource for your mapping information needs so you don't have to lose your way while searching for it. Remember the fun you had exploring the world with maps? Experience the fun again with Web Mapping Illustrated. This book will take you on a direct route to creating valuable maps.

The Secret Language of Maps Nov 18 2021 A highly visual exploration of diagrams and data that helps you understand how "maps" are part of everyday thinking, how they tell stories, and how they can reframe your point of view, from Stanford University's world-renowned d.school. "This book is the ultimate legend to mapping all kinds of data."—Jessica Hagy, Webby Award-winning blogger of Indexed and author of How to Be Interesting (In Ten Simple Steps) Maps aren't just geographic, they are also infographic and include all types of frameworks and diagrams. Any figure that sorts data visually and

presents it spatially is a map. Maps are ways of organizing information and figuring out what's important. Even stories can be mapped! The Secret Language of Maps provides a simple framework to deconstruct existing maps and then shows you how to create your own. An embedded mystery story about a woman who investigates the disappearance of an old high school friend illustrates how to use different maps to make sense of all types of information. Colorful illustrations bring the story to life and demonstrate how the fictional character's collection of data, properly organized and "mapped," leads her to solve the mystery of her friend's disappearance. You'll learn how to gather data, organize it, and present it to an audience. You'll also learn how to view the many maps that swirl around our daily lives with a critical eye, aware of the forces that are in play for every creator.

The Innkeeper of Ivy Hill (Tales from Ivy Hill Book #1)
Jan 09 2021 First Series from Bestselling Author Julie Klassen! The lifeblood of the Wiltshire village of Ivy Hill is its coaching inn, The Bell. But when the innkeeper dies suddenly, his genteel wife, Jane Bell, becomes the reluctant owner. Jane has no notion of how to run a business. However, with the town's livelihood at stake and a large loan due, she must find a way to bring new life to the inn. Despite their strained relationship, Jane turns to her resentful mother-in-law, Thora, for help. Formerly mistress of The Bell, Thora is struggling to find her place in the world. As she and Jane work together, they form a measure of trust, and Thora's wounded heart begins to heal. When she encounters two men from her past, she sees them--and her future--in a different light. With pressure mounting from the bank, Jane employs innovative methods to turn the inn around, and puzzles over the intentions of several men who seem to have a vested interest in the place. Will her efforts be enough to save The Bell? And

will Thora embrace the possibility of a second chance at love?

City Atlas Jul 15 2021 Take a tour of Toronto, look around Lisbon or hot-foot it to Helsinki with this global adventure in a book! 30 best-loved cities from around the world are brought to life with illustrations by Martin Haake, which show in fabulous detail key landmarks, famous people, iconic buildings and cultural icons for all the family to enjoy. A search-and-find game on every page helps young readers to explore every city and spot the hundreds of details that makes each place unique.

National Parks Maps Dec 20 2021 Explore all 62 national parks in the United States from the Atlantic to the Pacific and beyond in this illustrated map collection. Learn about our parks' founding fathers and the unique characteristics each park has to offer. National Parks Maps is an informative and educational art collection meant for park fans of all ages.

The history of the Peloponnesian war illustrated by maps, taken entirely from actual surveys by Thucydides
Jan 27 2020

The Public Mapping Project Oct 06 2020 The Laurence and Lynne Brown Democracy Medal is an initiative of the McCourtney Institute for Democracy at Pennsylvania State University. It annually recognizes outstanding individuals, groups, and organizations that produce exceptional innovations to further democracy in the United States or around the world. Micah Altman and Michael P. McDonald unveil the Public Mapping Project, which developed DistrictBuilder, an open-source software redistricting application designed to give the public transparent, accessible, and easy-to-use online mapping tools. As they show, the goal is for all citizens to have access to the same information that legislators use when drawing congressional maps—and use that data to create maps of their own. Thanks to generous funding

from The Pennsylvania State University, the ebook editions of this book are available as Open Access volumes from Cornell Open (cornellopen.org) and other repositories.

Prisoners of Geography Apr 23 2022 An abridged and illustrated young readers edition of the million-copy international bestseller Prisoners of Geography, explaining the fascinating ways geography has shaped world history with charming info-packed maps

Mapping Texas Mar 30 2020 3,822 perimeter miles. 11,247 rivers and streams. 8,749 feet at its height. 268,596 square miles in total. Texas is big. Julius Caesar once quipped that all of ancient Gaul could be divided up into three parts. Texas resists such easy division. Mapping Texas, edited by John S. Wilson, presents an array of early maps, dating from 1561 to 1860. The volume features selections from the extensive material housed in the Frances C. Poage Map Room of The Texas Collection at Baylor University. The painstaking labors of Spanish, French, English, and Mexican mapmakers illustrate the progressive and differing views of Texas geography and boundaries. Originally used as guides to new destinations, these maps also staked new claims, fueled by new dreams, on new territory that settlers had heard about but never seen. Page by page, Texas' iconic shape gradually emerges. As now-familiar cities dot this vast expanse of land, railroads trace the outline of rivers and mountain ranges, and ports anchor the curve of the Gulf of Mexico, Texas' rich history comes to life one map at a time. The volume concludes with an analysis of map art and cartouches--beautiful images that both name the map and highlight flora and fauna. A sumptuous delight for mind and eye, this volume lavishly documents the early outlines of the land over which six flags have proudly flown.

Maps: Deluxe Edition Mar 11 2021 Discover the world in this updated edition of the beloved bestseller,

featuring twenty-four all new maps. Explore the world anew with this lavish extended edition from the incomparable Mizielskis. This book features new and updated material on every spread and twenty-four entirely new maps. In addition to geographic features like borders and cities, this volume features places of historical and cultural interest, eminent personalities, cultural events, and iconic animals, allowing you to explore the globe without leaving your couch.

Mapping the World Oct 30 2022 "This book highlights more than a hundred maps from every era and every part of the world. Organized chronologically, they display an astonishing variety of cartographic styles and techniques. They range from priceless artistic masterworks like the 1507 Waldseemüller world map, the first to use the name "America," to such practical artifacts as a Polynesian stick chart, a creation of bent twigs, seashells, and coconut palms that was nevertheless capable of guiding an outrigger canoe safely across thousands of miles of trackless and seemingly endless ocean. Some, like the portolans, or sea charts, of the Age of Discovery, were closely guarded state secrets that shaped the rise and fall of empires; others circulated widely and showed such fabled routes as the Silk Road across western Asia and the Oregon and Santa Fe Trails that opened up the American West."--Jacket.

Illustrated Maps Sep 28 2022 This book is a selection of different ways to interpret a map at the illustrative level. Several artists have created maps of the world's most beautiful places and also of its main cities: Paris, Berlin, Dubai, Rio de Janeiro...They are illustrations full of color in which, each artist shows us his or her own way of working with them, with lines, geometrical shapes, some very detailed, very synthesized, using computers, watercolors or simply a pen... Illustrations by Studio Muti, Marcus Oakley,

Katie Vernon, Jackkrit Anantakul, Olaf Hajek who are only some of the artists collaborating in this great work.

Mapping Aug 28 2022 "Focusing on information design, this guide reveals the visual language of location, direction, spatial and structural relationships which are central to this sector of graphics, exploring 'maps' as varied as subway systems and websites to chemical symbols, and the mapping of time"--Publisher description.

Atlas of the Heart ____ May 01 2020 #1 NEW YORK TIMES BESTSELLER • In her latest book, Brené Brown writes, "If we want to find the way back to ourselves and one another, we need language and the grounded confidence to both tell our stories and be stewards of the stories that we hear. This is the framework for meaningful connection." In *Atlas of the Heart*, Brown takes us on a journey through eighty-seven of the emotions and experiences that define what it means to be human. As she maps the necessary skills and an actionable framework for meaningful connection, she gives us the language and tools to access a universe of new choices and second chances—a universe where we can share and steward the stories of our bravest and most heartbreaking moments with one another in a way that builds connection. Over the past two decades, Brown's extensive research into the experiences that make us who we are has shaped the cultural conversation and helped define what it means to be courageous with our lives. *Atlas of the Heart* draws on this research, as well as on Brown's singular skills as a storyteller, to show us how accurately naming an experience doesn't give the experience more power—it gives us the power of understanding, meaning, and choice. Brown shares, "I want this book to be an atlas for all of us, because I believe that, with an adventurous heart and the right maps, we can travel anywhere and never fear losing

ourselves.”

Mapping the Middle East Mar 23 2022 Mapping the Middle East explores the many ways people have visualized the vast area lying between the Atlantic Ocean and the Oxus and Indus River Valleys over the past millennium. By analyzing maps produced from the eleventh century on, Zayde Antrim emphasizes the deep roots of mapping in a region too often considered unexamined and unchanging before the modern period. As Antrim argues, better-known maps from the nineteenth and twentieth centuries—a period coinciding with European colonialism and the rise of the nation-state—not only obscure this rich past, but also constrain visions for the region’s future.

Organized chronologically, Mapping the Middle East addresses the medieval “Realm of Islam;” the sixteenth- to eighteenth-century Ottoman Empire; French and British colonialism through World War I; nationalism in modern Turkey, Iran, and Israel/Palestine; and alternative geographies in the twentieth and twenty-first centuries. Vivid color illustrations throughout allow readers to compare the maps themselves with Antrim’s analysis. Much more than a conventional history of cartography, Mapping the Middle East is an incisive critique of the changing relationship between maps and belonging in a dynamic world region over the past thousand years.

A History of the World in 12 Maps Oct 25 2019 A New York Times Bestseller “Maps allow the armchair traveler to roam the world, the diplomat to argue his points, the ruler to administer his country, the warrior to plan his campaigns and the propagandist to boost his cause... rich and beautiful.” – Wall Street Journal Throughout history, maps have been fundamental in shaping our view of the world, and our place in it. But far from being purely scientific objects, maps of the world are unavoidably ideological and subjective, intimately bound up with the systems of power and authority of particular times and places. Mapmakers do not simply represent the

world, they construct it out of the ideas of their age. In this scintillating book, Jerry Brotton examines the significance of 12 maps - from the almost mystical representations of ancient history to the satellite-derived imagery of today. He vividly recreates the environments and circumstances in which each of the maps was made, showing how each conveys a highly individual view of the world. Brotton shows how each of his maps both influenced and reflected contemporary events and how, by considering it in all its nuances and omissions, we can better understand the world that produced it. Although the way we map our surroundings is more precise than ever before, Brotton argues that maps today are no more definitive or objective than they have ever been. Readers of this beautifully illustrated and masterfully argued book will never look at a map in quite the same way again. "A fascinating and panoramic new history of the cartographer's art." – The Guardian "The intellectual background to these images is conveyed with beguiling erudition.... There is nothing more subversive than a map." – The Spectator "A mesmerizing and beautifully illustrated book." —The Telegraph

Web Mapping Illustrated Nov 30 2022 Provides information on how to create custom maps from tools available over the Internet.

The New Map Aug 23 2019 A Wall Street Journal bestseller and a USA Today Best Book of 2020 Named Energy Writer of the Year for The New Map by the American Energy Society "A master class on how the world works." —NPR Pulitzer Prize-winning author and global energy expert, Daniel Yergin offers a revelatory new account of how energy revolutions, climate battles, and geopolitics are mapping our future The world is being shaken by the collision of energy, climate change, and the clashing power of nations in a time of global crisis. Out of this tumult is emerging a new map of energy and geopolitics. The "shale revolution" in oil and gas has transformed

the American economy, ending the "era of shortage" but introducing a turbulent new era. Almost overnight, the United States has become the world's number one energy powerhouse. Yet concern about energy's role in climate change is challenging the global economy and way of life, accelerating a second energy revolution in the search for a low-carbon future. All of this has been made starker and more urgent by the coronavirus pandemic and the economic dark age that it has wrought. World politics is being upended, as a new cold war develops between the United States and China, and the rivalry grows more dangerous with Russia, which is pivoting east toward Beijing. Vladimir Putin and China's Xi Jinping are converging both on energy and on challenging American leadership, as China projects its power and influence in all directions. The South China Sea, claimed by China and the world's most critical trade route, could become the arena where the United States and China directly collide. The map of the Middle East, which was laid down after World War I, is being challenged by jihadists, revolutionary Iran, ethnic and religious clashes, and restive populations. But the region has also been shocked by the two recent oil price collapses--and by the very question of oil's future in the rest of this century. A master storyteller and global energy expert, Daniel Yergin takes the reader on an utterly riveting and timely journey across the world's new map. He illuminates the great energy and geopolitical questions in an era of rising political turbulence and points to the profound challenges that lie ahead.

Manhattan May 25 2022 Told in dazzling maps and informative sidebars, Manhattan explores the 400+ year history of Manhattan Island. From before its earliest settlement to the vibrant metropolis that exists today, the island of Manhattan has always been a place of struggle, growth, and radical transformation. Humans,

history, and natural events have shaped this tiny sliver of land for more than 400 years. In Manhattan, travel back in time to discover how a small rodent began an era of rapid change for the island. Learn about immigration, the slave trade, and the people who built New York City. See how a street plan projected the city's future, and how epic fires and storms led to major feats of engineering above and below ground. Through dramatic illustrations, informative sidebars, and detailed maps inspired by historic archives, Manhattan explores the rich history that still draws people from all around the world to the island's shores today. From The Battery downtown up to Inwood, every inch of the island has a story to tell.

The Culture Map (INTL ED) Oct 18 2021 An international business expert helps you understand and navigate cultural differences in this insightful and practical guide, perfect for both your work and personal life. Americans precede anything negative with three nice comments; French, Dutch, Israelis, and Germans get straight to the point; Latin Americans and Asians are steeped in hierarchy; Scandinavians think the best boss is just one of the crowd. It's no surprise that when they try and talk to each other, chaos breaks out. In The Culture Map, INSEAD professor Erin Meyer is your guide through this subtle, sometimes treacherous terrain in which people from starkly different backgrounds are expected to work harmoniously together. She provides a field-tested model for decoding how cultural differences impact international business, and combines a smart analytical framework with practical, actionable advice.

50 Cities of the U.S.A. Aug 04 2020 From Anchorage to Washington D.C., take a trip through America's well-loved cities with this unique A-Z like no other, lavishly illustrated and annotated with key cultural icons, from famous people and inventions to events, food, and monuments. Explore skyscraper streets, museum

miles, local food trucks, and city parks of the United States of America and discover more than 2,000 facts that celebrate the people, culture, and diversity that have helped make America what it is today. Cities include Anchorage • Atlanta • Austin • Baltimore • Birmingham • Boise • Boston • Burlington • Charleston • Charlotte • Cheyenne • Chicago • Cleveland • Columbus • Denver • Detroit • Hartford • Honolulu • Houston • Indianapolis • Jacksonville • Kansas City • Las Vegas • Little Rock • Los Angeles • Louisville • Memphis • Miami • Milwaukee • Minneapolis-St. Paul • Nashville • New Orleans • New York • Newark • Newport • Oklahoma City • Philadelphia • Phoenix • Pittsburgh • Portland, ME • Portland, OR • Rapid City • Salt Lake City • San Francisco • Santa Fe • Seattle • St. Louis • Tucson • Virginia Beach • Washington, D.C. Beautiful illustrations, maps, and infographics bring the places to colorful life. Also available from the series: The 50 States, The 50 States: Activity Book, The 50 States: Fun Facts, 50 Trailblazers of the 50 States, 50 Maps of the World, 50 Adventures in the 50 States, 50 Maps of the World Activity Book, Only in America!, and We Are the 50 States.

The Phantom Atlas Jul 03 2020 Discover the mysteries within ancient maps — Where exploration and mythology meet This richly illustrated book collects and explores the colorful histories behind a striking range of real antique maps that are all in some way a little too good to be true. Mysteries within ancient maps: The Phantom Atlas is a guide to the world not as it is, but as it was imagined to be. It's a world of ghost islands, invisible mountain ranges, mythical civilizations, ship-wrecking beasts, and other fictitious features

introduced on maps and atlases through mistakes, misunderstanding, fantasies, and outright lies. Where exploration and mythology meet: Author Edward Brooke-Hitching is a map collector, author, writer for the popular BBC Television program QI and a Fellow of the Royal Geographical Society. He lives in a dusty heap of old maps and books in London investigating the places where exploration and mythology meet. Cartography's greatest phantoms: The Phantom Atlas uses gorgeous atlas images as springboards for tales of deranged buccaneers, seafaring monks, heroes, swindlers, and other amazing stories behind cartography's greatest phantoms. If you are a fan of this popular genre and a reader of books such as Prisoners of Geography, Atlas of Ancient Rome, Atlas Obscura, What If, Book of General Ignorance, or Thing Explainer, you will love The Phantom Atlas

Mapping Manhattan Jun 01 2020 Armed with hundreds of blank maps she had painstakingly printed by hand, Becky Cooper walked Manhattan from end to end. Along her journey she met police officers, homeless people, fashion models, and senior citizens who had lived in Manhattan all their lives. She asked the strangers to "map their Manhattan" and to mail the personalized maps back to her. Soon, her P.O. box was filled with a cartography of intimate narratives: past loves, lost homes, childhood memories, comical moments, and surprising confessions. A beautifully illustrated, PostSecret-style tribute to New York, Mapping Manhattan includes 75 maps from both anonymous mapmakers and notable New Yorkers, including Man on Wire aerialist Philippe Petit, New York Times wine critic Eric Asimov, Tony award-winning actor Harvey Fierstein, and many more. Praise for Mapping Manhattan: "What an intriguing project."—The New York Times "A tender cartographic love letter to this timeless city of multiple dimensions, parallel realities, and perpendicular views." —Brain Pickings "Cooper's beautiful project linking the lives

of New Yorkers is one that will continue to grow."

—Publishers Weekly online

Me on the Map Sep 04 2020 Maps can show you where you are anywhere in the world! A beloved bestseller that helps children discover their place on the planet, now refreshed with new art from Qin Leng. Where are you? Where is your room? Where is your home? Where is your town? This playful introduction to maps shows children how easy it is to find where they live and how they fit in to the larger world. Filled with fun and adorable new illustrations by Qin Leng, this repackaged Me on the Map will show readers how easy it is to find the places they know and love with help from a map.

The Boy Who Loved Maps Jan 21 2022 This enchanting picture book about a map-making boy who is stumped when a girl asks him for a map of the "perfect place" helps readers appreciate the charms of their own neighborhood--and even shows them how to make a map of it! The Mapmaker loves maps. He loves to collect them, to study them, and most of all, he loves to make them. But when a girl asks for a map of a perfect place, the Mapmaker is perplexed. She wants a map to a toes-in-the-sand-warm, X-marks-the-spot-place filled with treasures, where it smells like her birthday and she can zip around like a dragonfly. Surely, a place that is all of these things can't exist...can it? Well, after a fun-filled day of exploring the neighborhood, the Mapmaker will discover that the perfect place--home--has been right in front of him all along. Here is a picture book, as creative as it is charming, that celebrates home, and is a gentle reminder to look around and appreciate what surrounds you.

Mapping Penny's World Dec 08 2020 After learning about maps in school, Lisa maps all the favorite places of her dog Penny.

The Art of Illustrated Maps Jan 01 2023 While literally hundreds of books exist on the subject of "cartographic"

maps, *The Art of Illustrated Maps* is the first book EVER to fully explore the world of conceptual, "imaginative" mapping. Author John Roman refers to illustrated maps as "the creative nonfiction of cartography," and his book reveals how and why the human mind instinctively recognizes and accepts the artistic license evoked by this unique art form. Drawing from numerous references, *The Art of Illustrated Maps* traces the 2000-year history of a specialized branch of illustration that historians claim to be "the oldest variety of primitive art." This book features the dynamic works of many professional map artists from around the world and documents the creative process as well as the inspirations behind contemporary, 21st-century illustrated maps.

[Great Maps](#) May 13 2021 The whole world is mapped out for your viewing pleasure in this captivating compendium, ranging from past to present through diverse themes of transport and technology to discoveries and development. Covering the classical maps of the ancient world and traveling through time to reach Google Earth in the 21st century, this unprecedented history of more than 60 maps opens up our planet as never before. *Great Maps* showcases early Medieval maps like including *mappae mundi*; iconic transport maps such as the London Underground; important travel maps including Dr. Livingstone's version of Africa; maps of natural wonders such as the ocean floor; and momentous moments including the marks on the Moon left by the lunar landings. There are maps that show the way to heaven, depict lands with no sunshine, and the mysterious home of "the people with no bowels" on this mind-blowing journey. Much more than just geographical data, maps are an accurate reflection of the culture and context of different time frames in history. British historian Jerry Brotton tells the amazing secret stories behind many of the most significant maps ever unearthed, revealing key features and innovative techniques in incredible detail. The

unique insight into how mapmakers have expressed their world views results in this treasured book that makes a welcome addition to any bookshelf or home library.
